Contrôle TD 1 → 8

```java
public class Test {
    static int a; -
    Test (int a) {
        this.a = a;
    }
}

public class Test2 {
```

```
void change (){
    int b = Test.a;
    Test n = new Test(4);
    int c = n.a;
    Test.a = 22;
}
```

Private char C

```
            getC();
            setC();

public class A abstract {
    public void toString();
    public void Parse();
}

public class _____ extends _____
```

```
public class = Bestient
4 {
    public void toString() {
        // afficher l'objet courant
    }

    this. toString()

    String a = "Vala"
    a. A. toString
```

$$d . toString()$$

$$i + 1$$

1	2	3		

$l =$ 0   1   2   3 ... ...
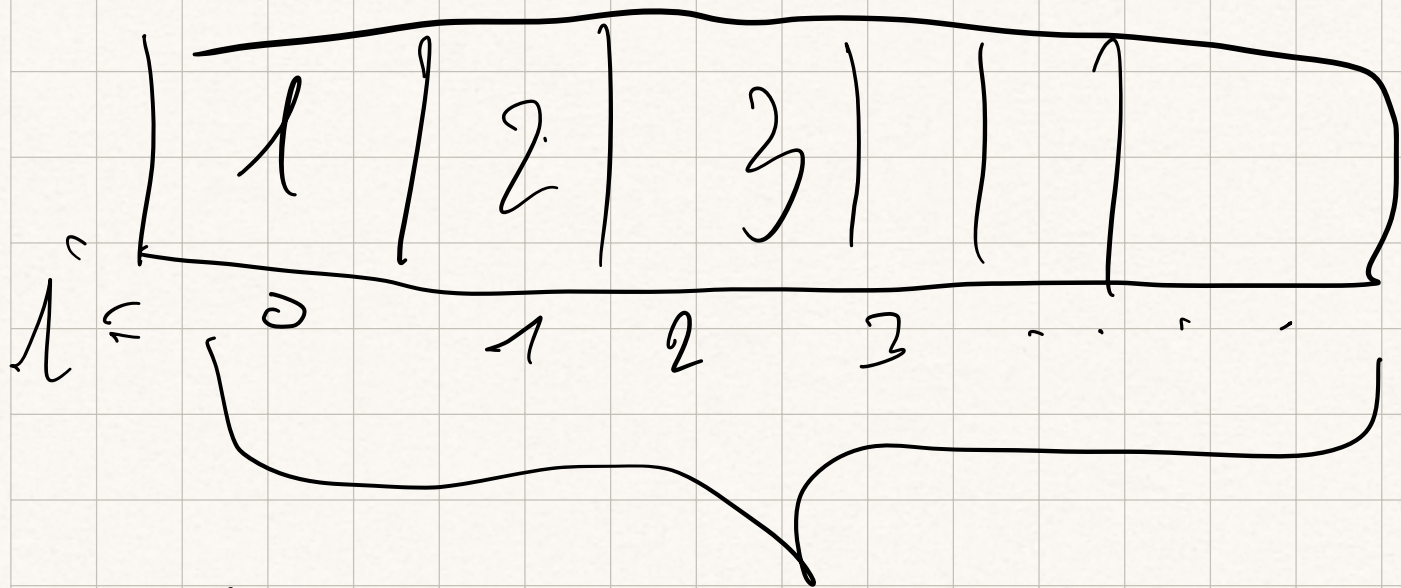

l : population

i = identifiant .

$l [0] = \sim \sim$

$0 \Rightarrow id$

```
etat[i] = new Process[int];
